NSP-2422R

Polymer Non-Rechargeable Dual-Light™ Flashlight with Dual Magnets

MARKET APPLICATIONS Industrial, Automotive, Sporting Goods, Public Safety & Military

DESCRIPTION The Nightstick NSP-2422B Dual-Light™ flashlight uses a CREE® LED rated at 130 lumens paired with a high-efficiency deep parabolic reflector, creating a flashlight beam with an effective range of 181 meters (over 590 feet). Additionally, built into the handle is a 110 lumen floodlight. Unlike the flashlight beam, the light coming out of the floodlight does not have a reflector so the light spreads out in a wide, even, unfocused pattern of light...perfect for lighting up things that are close. Additionally, both the flashlight and the floodlight can be turned on at the same time for even more versatile lighting options. The integrated magnets located in the base of the handle and in the clip, provides for almost limitless hands-free usage.
